Company profiles

Leading the digital supply chain

Nisun International Enterprise Development Group Co., Ltd (NASDAQ: NISN) is a technology-driven, integrated supply chain solutions provider focused on transforming the corporate finance industry. Leveraging its rich industry experience, Nisun is dedicated to providing professional supply chain solutions to Chinese and foreign enterprises and financial institutions. Through its subsidiaries, Nisun provides users with professional solutions for technology supply chain management, technology asset routing, and digital transformation of tech and finance institutions, enabling the industry to strengthen and grow. At the same time, Nisun continues to deepen the field of industry segmentation through industrial and financial integration, by cultivating/creating an ecosystem of openness and empowerment. Nisun has built a linked platform that incorporates supply chain, banking, securities, trust, insurance, funds, state-owned enterprises, among other businesses. Focusing on industry-finance linkages, Nisun aims to serve the upstream and downstream of the industrial supply chain while also assisting with supply-side sub-sector reform.

Supply Chain Industry Cluster

Create a "four streams in one" supply chain solution service provider

Integrate and improve service efficiency by means of technology, and provide efficient and risk-controllable supply chain services for industrial users by adopting warehousing authorization management, material pledge, warehouse receipt management, etc.

Introduce financial service methods such as agency procurement, credit sales, and pallets in the supply chain management to increase customer stickiness and optimize the integration of resources in all links of the supply chain

Integrate industries through platforms, focusing on building five major industries: e-commerce supply chain, gold supply chain, coal supply chain, chemical supply chain, and agricultural supply chain

Integrate environmental elements, upstream and downstream nodes, and business operations, and accurately analyze business portraits to reduce business costs

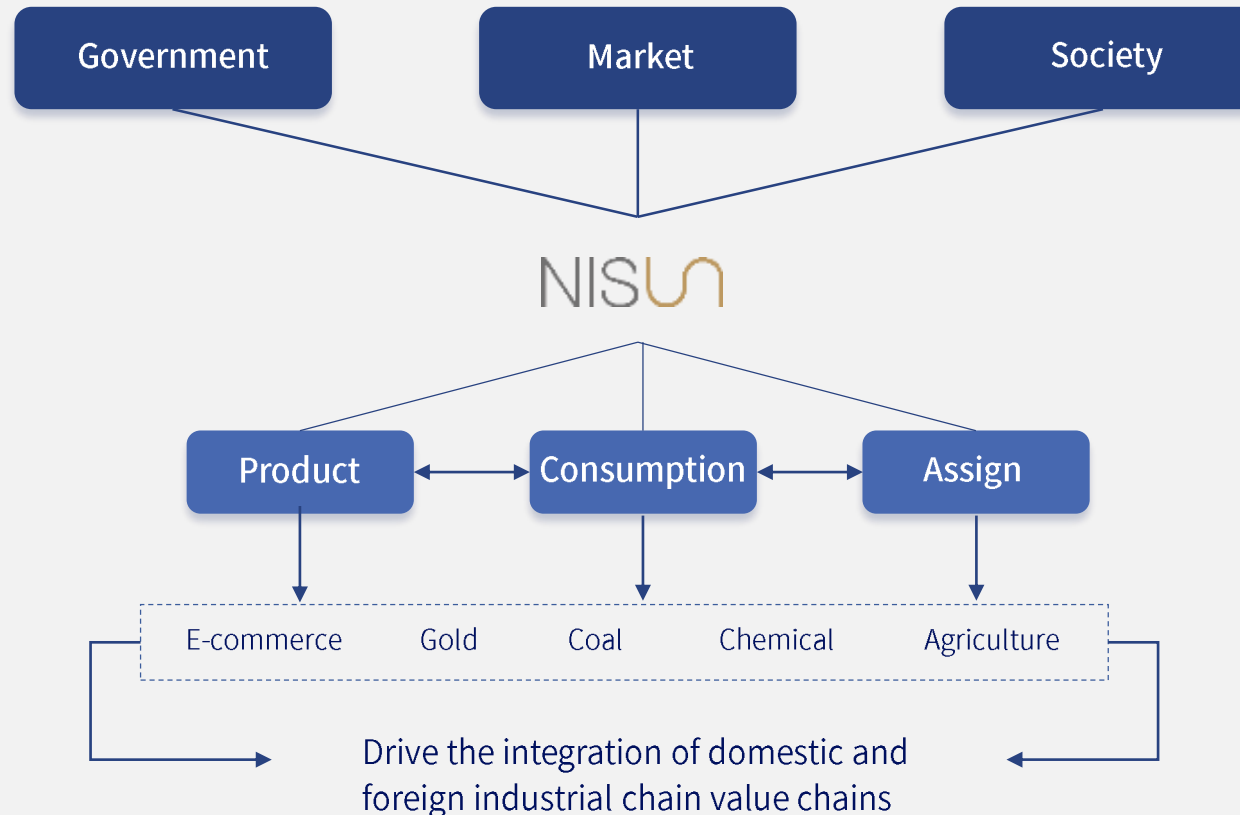

Relying on the Group's strategic planning, further create intelligent supply chain application scenarios, focus on the construction of one-stop service platform, and create a new development pattern with digital supply chain applications

Supply Chain Industry Cluster

Government-enterprise linkage

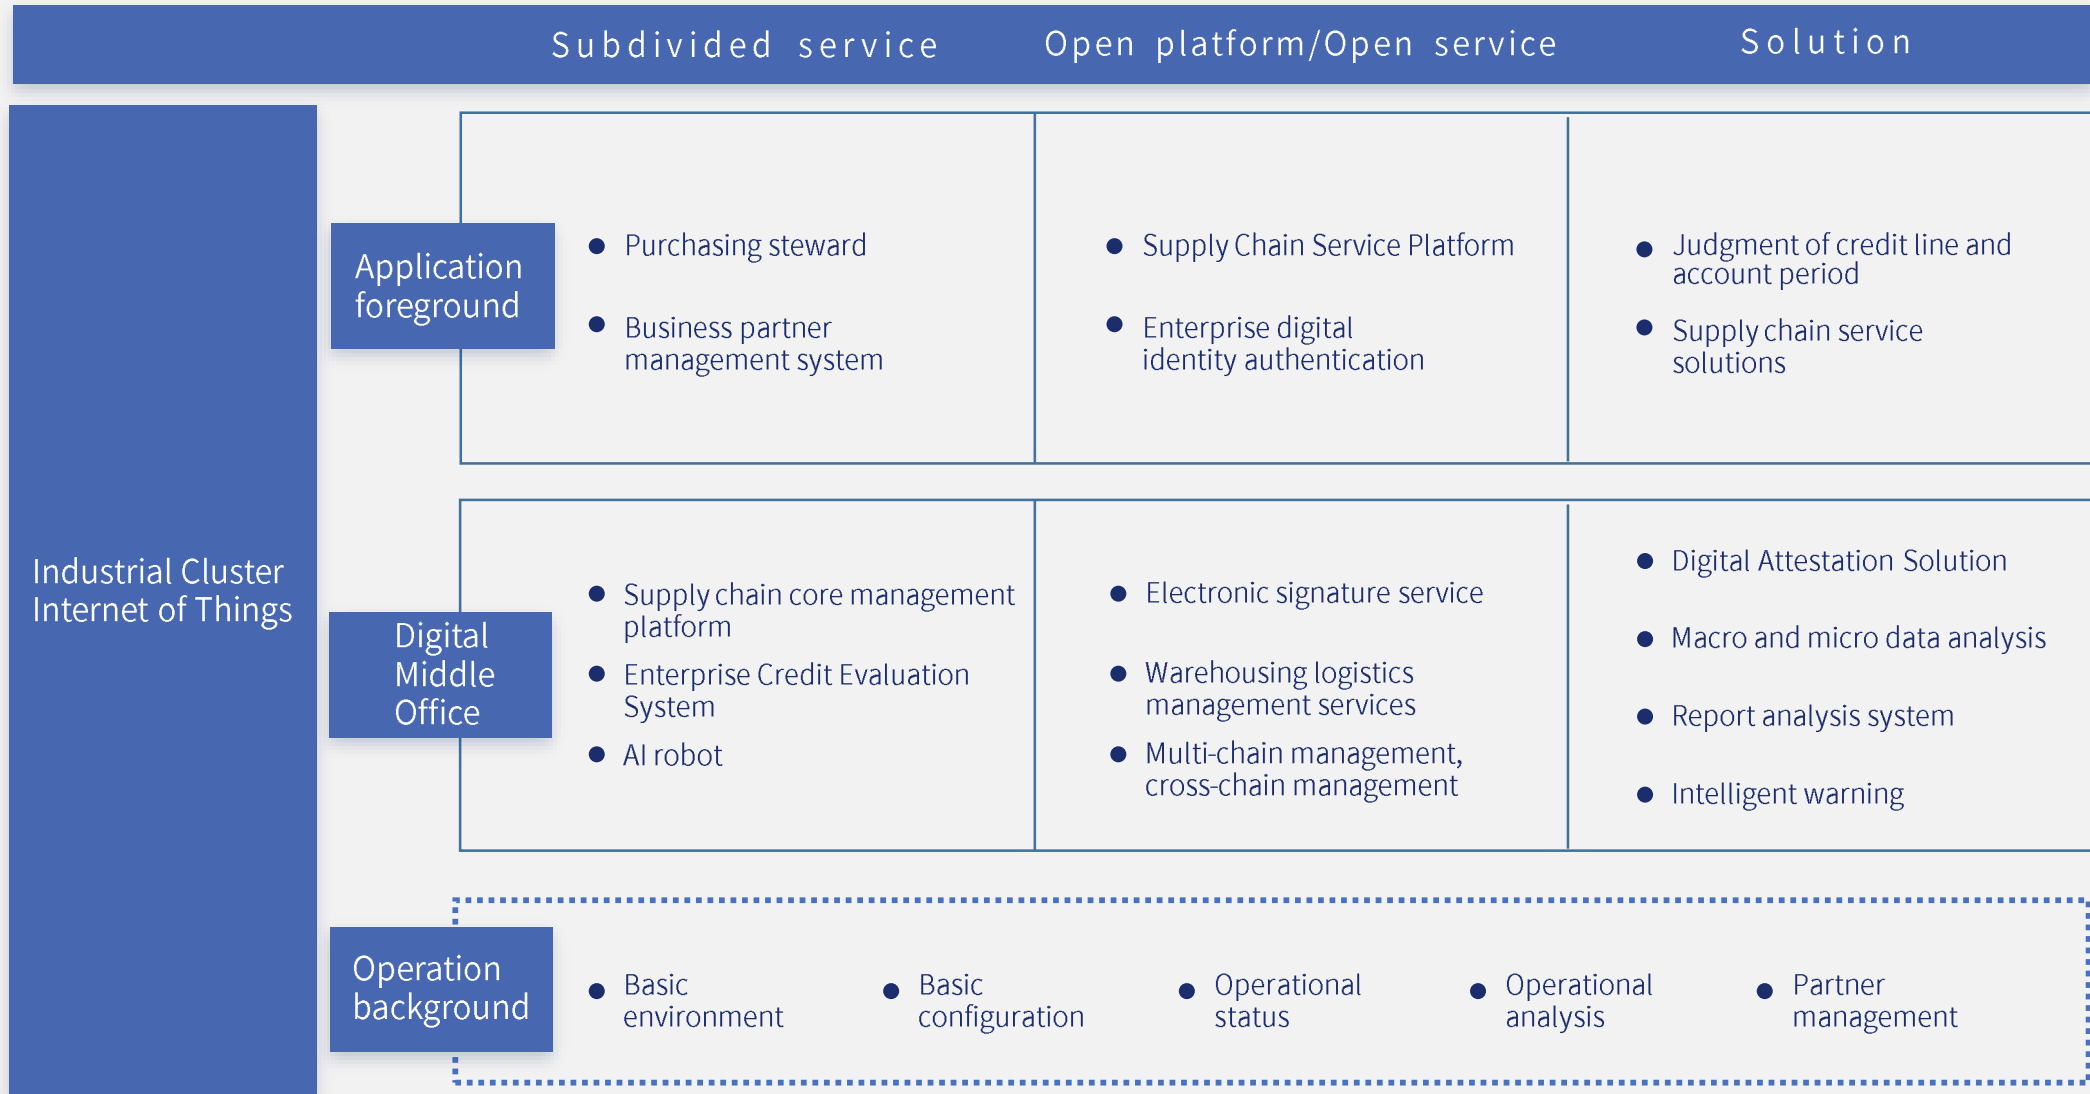

Insist on the organic combination of government platform, market and society to build a joint government-enterprise supply chain joint venture platform to promote smooth circulation at home and abroad in terms of production, consumption and distribution; deepen the group's five core industries, introduce upstream and downstream industry chain resources, and form a clustering effect ; Working with the government to drive the integrated development of the industrial chain and value chain.

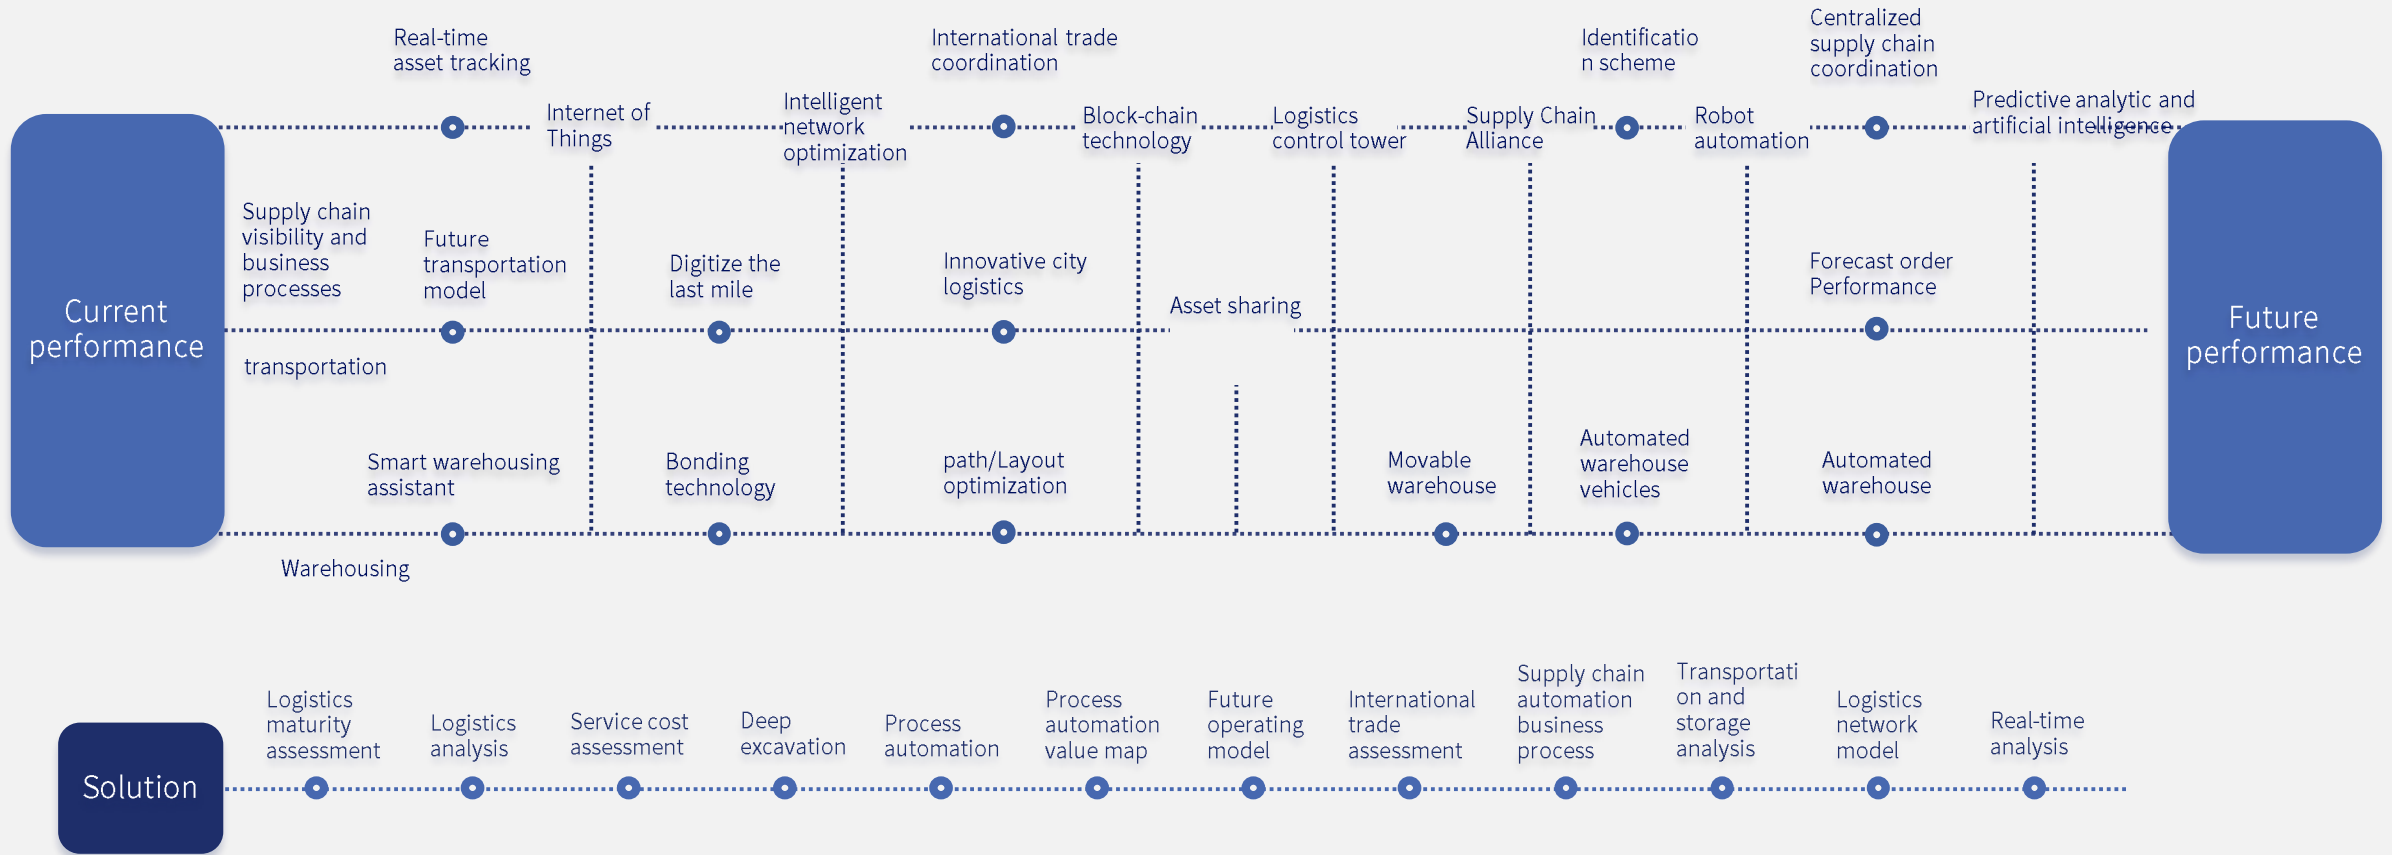

Technology service

Building core system for supply chain development

THREE

Supply chain strategic layout

Create a diversified business development model

- Supply chain
- Strategic layout
- Business structure
- Business model

Paraphrase

Focusing on the core enterprise, interlocking suppliers, manufacturers, distributors, and users, so as to realize the closed loop of "logistics, information flow, business flow, and capital flow".

Features

- Industry barriers are higher
- Strong professional requirements
- Strong resource integration
- Technological stability and innovation are the foundation

Advantage

- Solve to reduce logistics costs and improve capital turnover
- Solve information asymmetry, solve upstream and downstream information sharing
- Solve the problem of "integration of industry and finance" in helping local government industries, promote local economic development, provide professional talents, professional technology, professional integration, and special funds for local governments and enterprises to jointly promote national strategic goals and reflect personal values Struggling

Strategic layout

Guided by the national industrial policy, form a modern supply chain management service system

Investment incubation industry empowerment

Relying on the development advantages of the five core industries of Nisun Group, connecting more innovative resources, realizing value sharing, and assisting industry empowerment with strong capital power

Industrial cluster economy

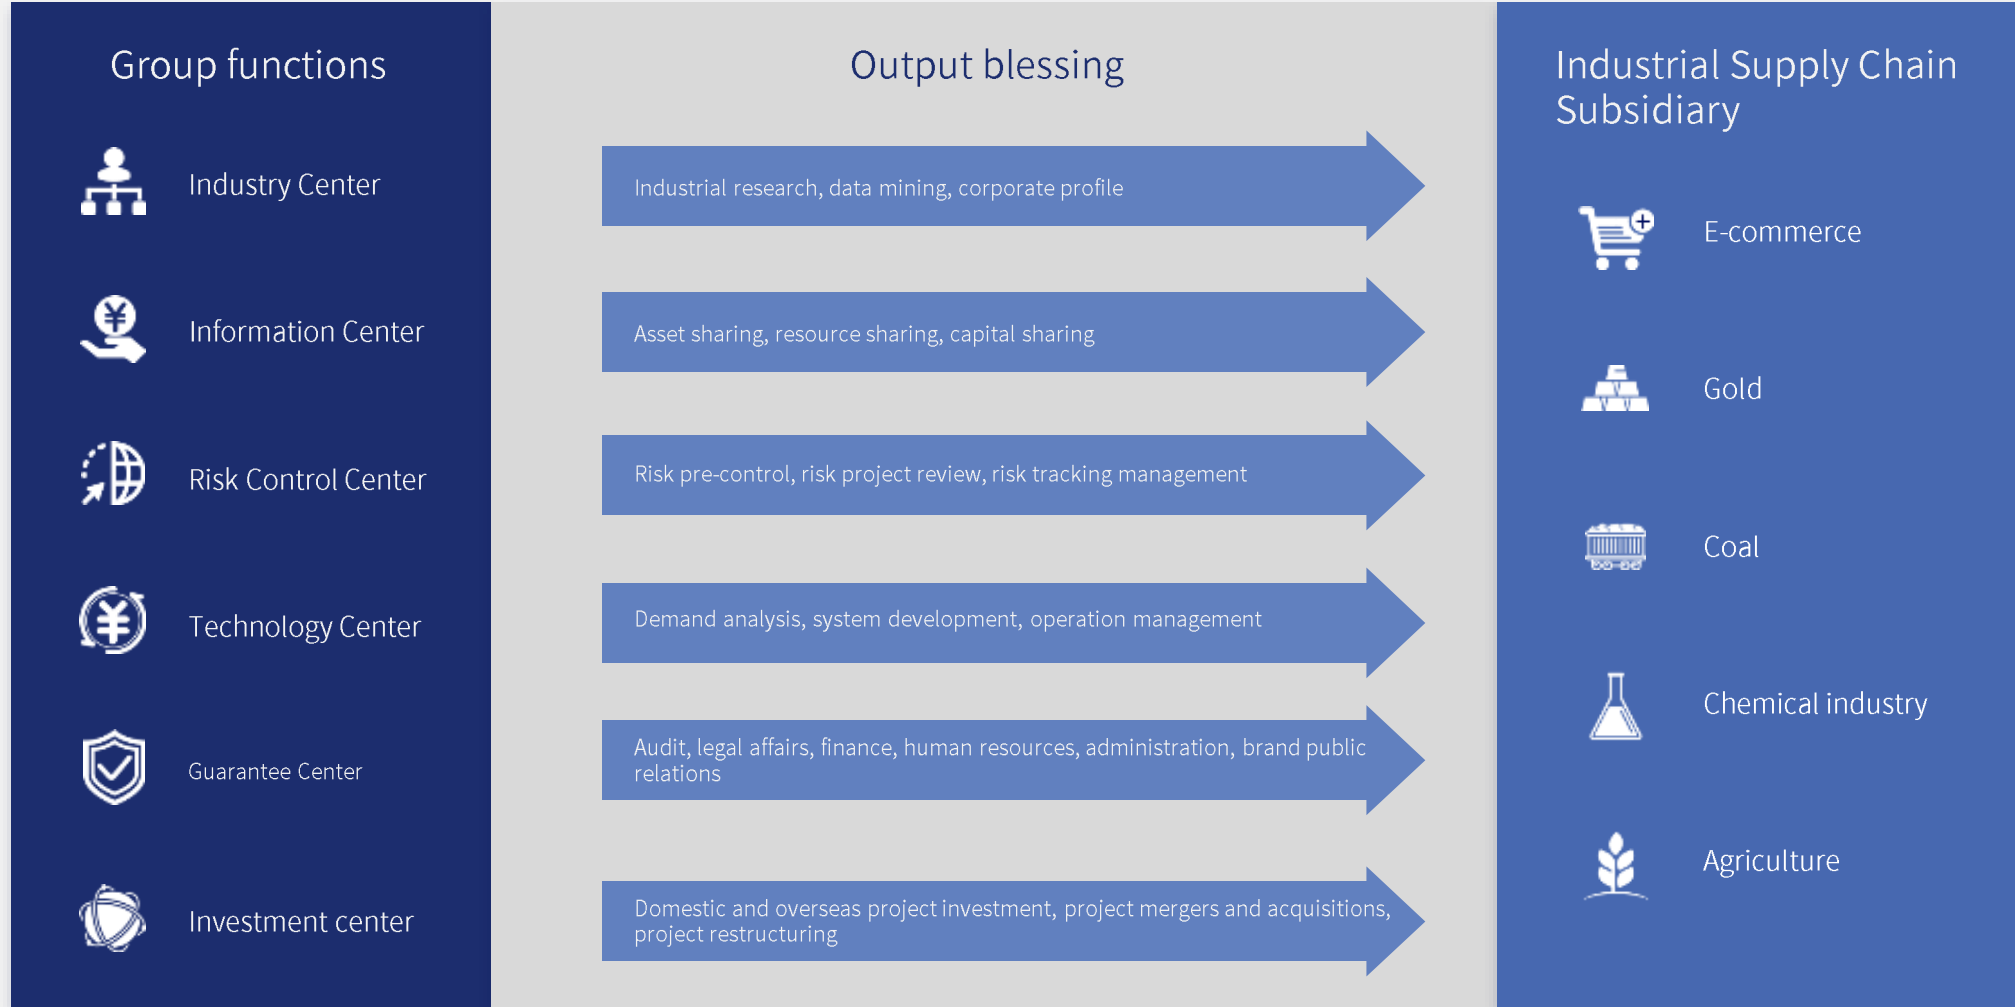

Open up the upstream and downstream industrial chains of relevant enterprises in the supply chain, facilitate collaboration between enterprises, and finally form an industrial cluster economy

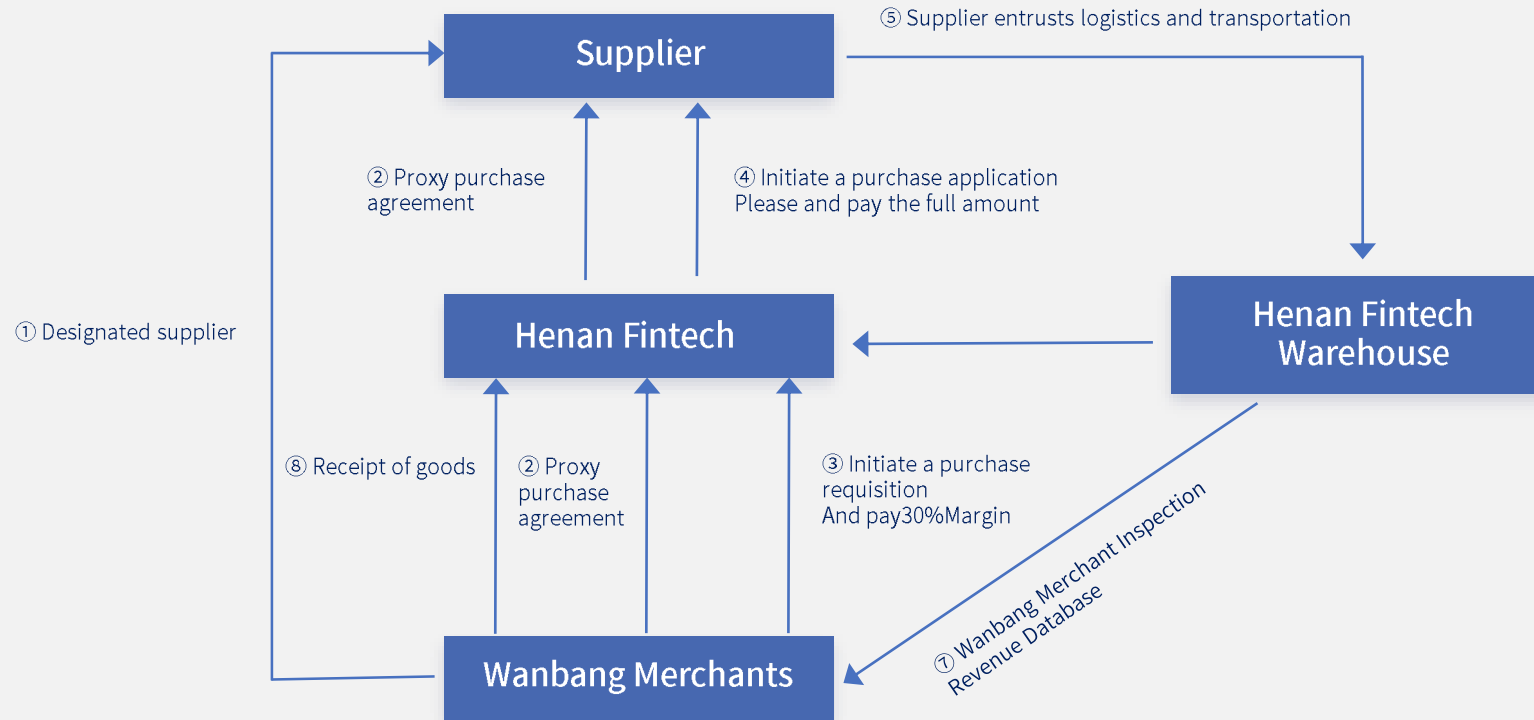

Supply Chain Industry Guidance Fund

Relying on local government brand advantages, resource advantages, capital advantages and Nisun Group's talent advantages, capital advantages and efficient and flexible professional integration advantages, the government and enterprises are combined with each other, and the resource advantages are complemented to jointly develop the local industrial economy and facilitate the introduction of industries at home and abroad. And local industries go global, and jointly empower local industries and promote economic development. Make a strong contribution to reflect personal value, help enterprises, help industries, and help society

Build a modern supply chain development system with dual circulation at home and abroad with Nisun characteristics

Wanbang Agricultural Products Supply Chain Project

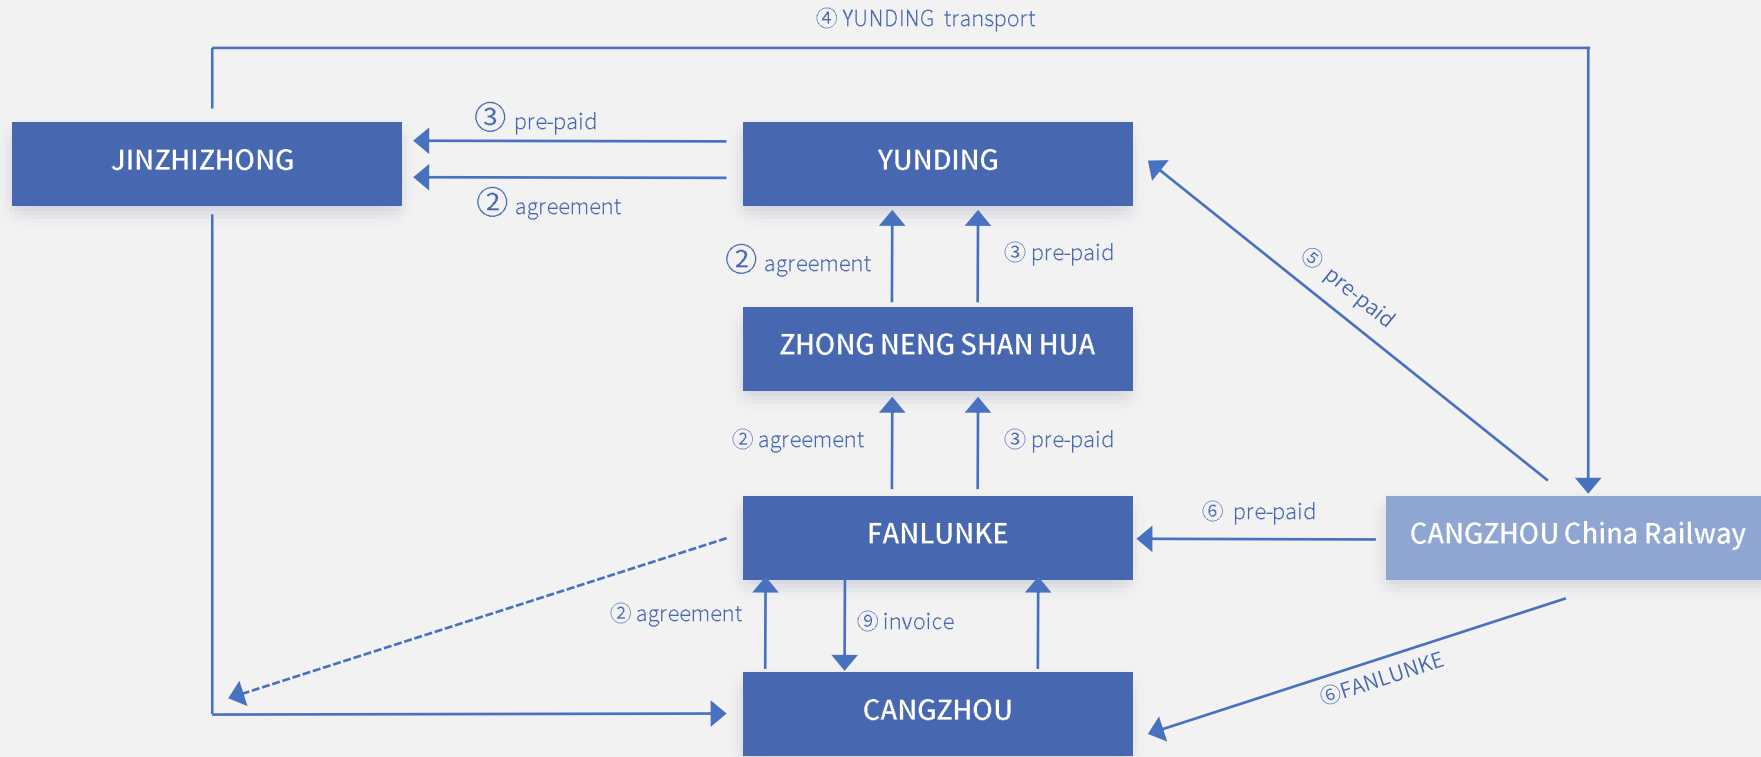

Core enterprise: Henan Wanbang International Agricultural Products Logistics City

Core advantages: The designated market of the Ministry of Agriculture, the key agricultural batch market guaranteed by the Ministry of Commerce, the national key leading enterprise in agricultural industrialization, the national comprehensive pilot unit for modern circulation of agricultural products, the national backbone cold chain logistics base, the national-level supply chain innovation and application pilot enterprise, the national-level "Star Creation World", the national "Ten Thousand Enterprises Helping Ten Thousand Villages" Advanced Private Enterprise for Targeted Poverty Alleviation, and a National Key Guarantee Enterprise for Epidemic Prevention and Control. Own over 7000 merchants. The annual transaction volume over 20 million tons, over 100 billion yuan, ranking top three in the national agricultural product market.

Business model: For the project, the downstream Wanbang merchants, Henan Fintech, and the designated upstream suppliers respectively signed annual proxy purchase agreements. Wanbang merchants initiated a single purchase application as needed, and provided a deposit to Henan Fintech, and Henan Fintech paid the designated suppliers. The supplier entrusts logistics to transport the goods to Henan Fintech warehouse, which will be inspected and collected by Wanbang merchants on the spot, and Henan Fintech's local team will follow up and monitor the inspection.

Cangzhou China Railway Coking Coal Supply Chain Flow Chart

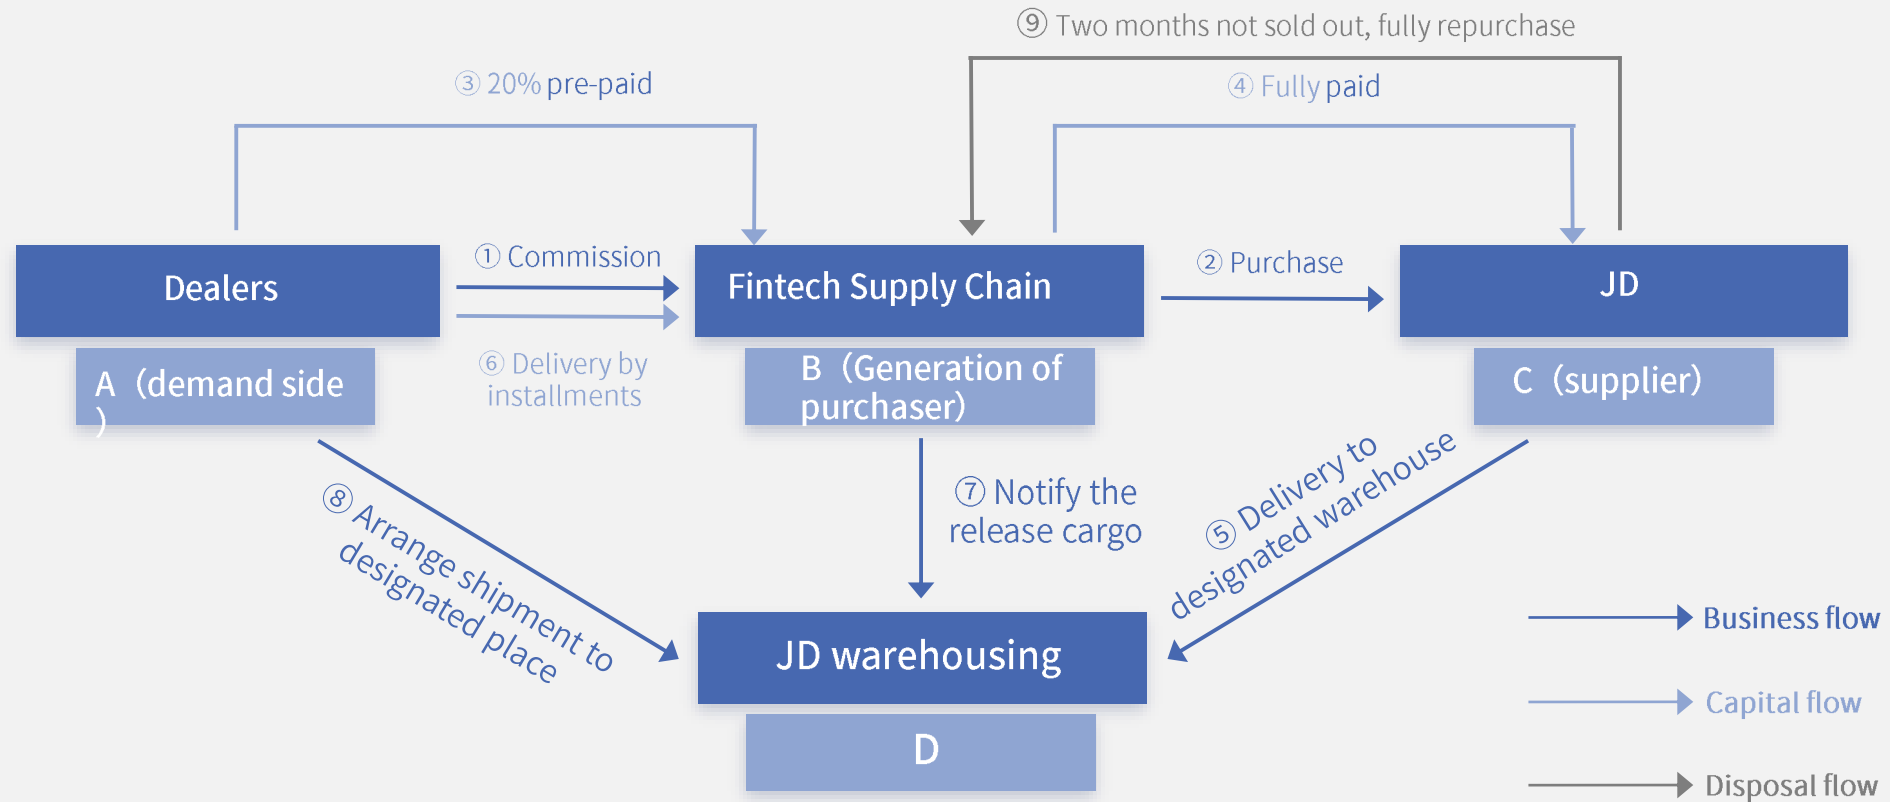

Core enterprise: Zhongneng Shanhua, Yunding Energy

Core advantages: Large-scale iron and steel enterprise groups and Chinese enterprises that are mainly supported during the "13th Five-Year Plan", and one of the top 100 private enterprises in China, is the largest project in Cangzhou City, Hebei Province, and a key project in Hebei Province. Total investment over 16 billion yuan.

Business model: Shanghai Fanlunke directly participates in the coal supply chain through trade as the main provider of project funds. Coal-using companies, coal-using company suppliers, Shanghai Fanlunke, coal washing plants, and coal mines have signed back-to-back procurement contracts in turn, and the quality and quantity of each layer will be confirmed. Finally, the coal washing plant or coal mine will supply coal to the coal-using companies, and the coal-using companies or Suppliers of coal-using enterprises are mainly state-owned enterprises or listed companies.

Trading process

Core enterprise: Beijing Jingdong Century Information Technology Co., Ltd.

Core advantages: China's first comprehensive e-commerce platform to successfully go public in the United States, currently has super 800 Million active corporate customers are super 91% World in China 500 The common choice of strong companies. 2021 Jingdong's total revenue 2538100 million yuan, net profit 7.9 Billion yuan, own 5.3 Billion active consumers. JD Logistics has established a coverage of more than 220 International routes in countries and regions, with 32 Bonded warehouses and overseas warehouses to ensure 48h it can be shipped from China to the destination country within hours.

Business model: Based on the needs of downstream buyers to develop supply chain business services in joint venture brands such as Philips, Sharp, and Sony, and domestic brand household appliances such as Haier, Hisense, and Midea.

FOUR

Gain momentum

Value-driven, forging the core competitiveness of the supply chain

- Symbiosis and win-win
- Social honor

WIN

Symbiosis and win-win

■ Qingdao Chengyang District Sunshine Chengyang Holding Group Co., Ltd. was established in 2019 year 12 moon 19 Registered capital 50100 million yuan, from the State-owned Assets Development Center of Chengyang District, Qingdao City 100% It is a wholly-owned state-owned enterprise in Chengyang District. Chengyang has a good business environment, and Sunshine Financial Holdings has a good capital accumulation.

■ In this cooperation, the "Qingdao Sunshine Nisun Supply Chain Industry Platform" project was officially signed, and the two parties released more development space and vitality in the field of e-commerce supply chain, thereby promoting the "innovation chain, industrial chain, capital chain, and talent chain" The further integration of Chengyang has become a "combustion aid" to promote the high-quality development of Chengyang.

■ Gansu Silk Road Huixiang Trading Co., Ltd. was established in 2012 year 8 moon 16 Japan, a wholly-owned subsidiary of Jiuquan Economic Development and Investment (Group) Co., Ltd., a wholly-owned municipal state-owned enterprise. It mainly focuses on rural revitalization, energy and chemical industry, modern service industry and other fields to build an industry based in Jiuquan and facing the Silk Road Economic Belt Chain supply chain service provider.

■ The two parties jointly invested to establish a supply chain joint venture company in Jiuquan City, and reached in-depth cooperation in the field of chemical supply chain, to provide professional supply chain services around the development of the local industrial chain in Jiuquan City, to transform resource advantages into economic and competitive advantages, and to promote The high-level development of both sides adds new momentum.

■ Yingkou houses majority of Yongxiang Logistics' cargo shipping ports. At present, Yongxiang Logistics' business volume of transporting has reached a range of 20,000 to 30,000 TEU per month, ranking in the top three in third-party logistics for domestic container coastal transportation. With annual revenue of 800 million yuan in 2020, Yongxiang Logistics has formed a business structure with multi-site networks and full port coverage that includes the Yangtze River, and the Pearl River.

■ Over the years, relying on its core strategy of "integrated supply chain," Nisun has actively promoted the implementation of supply chain innovation technologies in the logistics field and integrated its supply chain business into the entire industry chain. Through the integration of technology, industry and finance, Nisun will create a subdivision ecosystem to benefit all parties. In the future, Nisun will continue to promote the construction of a modern and high-quality, comprehensive three-dimensional transportation network.

■ Beijing Jingdong Century Information Technology Co., Ltd is wholly-owned by Beijing Jingdong Century Trading Co., Ltd and a subsidiary of JD.com. Under this cooperation, the two groups will lean on their respective logistics networks, supply chain resources, and technologies, to complement each other's advantages and collaborate to develop integrated supply chain solutions targeting the e-commerce industry, deploying JD's e-commerce platform and prioritizing customer experience. Through this cooperation, Nisun will further integrate the upstream and downstream of supply chain logistics and improve efficiency to provide comprehensive products and sales solutions.

■ "This partnership with China's e-commerce giant marks another important step for Nisun in the deployment of our long-term growth strategy while providing an opportunity for us to expand our presence in the e-commerce field," said Mr. Xiaoyun Huang, Chairman and Chief Executive Officer of Nisun International. "In addition, making use of JD's advantages in traffic, logistics, and warehousing, Nisun can accelerate its growth in the supply chain industry while improving its capacity and efficiency in supply chain management. This partnership will allow us to improve product and service offerings and remain focused on our goals to meet customer demands while creating value for shareholders."

■ The cooperation with Shanghai Bailian helps Nisun further its strategy to deepen its presence in the market segment. This partnership will also enhance the Company's development advantages in five core industries such as agriculture, e-commerce, gold, coal, chemical industry, connect more innovative resources, and facilitate value sharing. Nisun will continue to strengthen its capital power to establish its presence in the industry, expand the upstream and downstream supply chains, and form an industrial cluster economy, in effort to promote the development of supply chain standardization, digitalization, and globalization.

■ In recent years, the market for 3C Products in China has boomed, driven by favorable government policies, innovative technologies, and increased market demands. Under this cooperation, Nisun and Shanghai Bailian will join together to promote the ongoing expansion and transformation of the 3C Products market in China.

■ Dixintong (HKEX: 06188) is China's largest retail chain for mobile phones and accessories. It primarily operates in the retail and wholesale areas of mobile communication equipment and accessories with over a thousand directly operated and franchised stores. Over the years, Dixintong has entered into long-term strategic cooperation with major mobile phone manufacturers, suppliers and operators, while cooperating closely with major e-commerce giants such as JD.com and Alibaba.

■ Nisun and Dixintong will cooperate in supply chain management services to improve the efficiency and safety of the upstream and downstream retail consumer supply chain across multiple industries. Through gradual expansion in scale, the two parties will strengthen the cooperation and bring more value to their respective shareholders.

■ Founded in 2006, Cangzhou China Railway Equipment Manufacturing Materials Co., Ltd. is located in the important economic growth zone of the Beijing-Tianjin-Rim and Bohai Economic Rim-Bohai New District, Cangzhou, With a unique geographical location in Hebei Province, Cangzhou Railway is an important strip for hot-rolled production base in northern China and the first set of iron and steel enterprises in Hebei Province to pass the review by China's Ministry of Industry and Information Technology.

■ The coal supply chain holds great potential for future development and market prospects, making it an important area to facilitate industry transformation and poverty reduction. Using the coal market's current conditions and industry-finance integration as a starting point, Nisun will strengthen and improve its management capabilities to enhance the core value and credit quality of the coal supply chain. At the same time, Nisun will promote the high-end, differentiated development of the industrial chain through innovative incubation while cultivating of new projects and business models.

■ Shanxi Zhongneng Shanhua Energy Co., Ltd is a subsidiary of Shanxi Energy Group, a Shanxi provincial government backed major energy enterprise. Its business encompasses the development of new energy technology, the coal industry, construction projects and electronic products.

■ Nisun will leverage its expertise in supply chain management to build an efficient, reliable and credible digital supply chain system for Zhongneng Shanhua, using innovative technologies such as blockchain and big data algorithms. This newly developed system is expected to accelerate the digital transformation of Zhongneng Shanhua's upstream and downstream supply chain. Through this partnership, Nisun will promote the integration of its supply chain services and expand its customer base in the energy industry while improving client experiences through the energy technological expertise of Zhongneng Shanhua.

■ Established in 2011 in Zhengzhou City, Henan Province, Wanbang International Agricultural Product Logistics Park is a fresh produce wholesale market and joint-stock company that focuses on the distribution logistics of agricultural products, which includes trading, warehousing, quality inspection, and scientific research, as well as other functions. Wanbang International covers a total planned area of 5,300 acres under construction with its first phase covering 1,600 acres.

■ As a competitive solutions service provider in the supply chain industry, Nisun actively responds to China's recent regulatory measures promulgated by the Ministries of Finance and Commerce to further strengthen the construction of the agricultural product supply chain system, firmly grasping the market's consumption trend to continuously enhance its product structure. Under this new cooperation, the two parties will engage in close communication and exchanges based on supply of raw materials, one-stop food supply chain, production and processing facilities, and other factors, with an overarching goal to create a "full-chain, online, standard, traceable, new-model, and highly efficient" logistics system.

■ First launched in 2015, SHPGX is a comprehensive service system for petroleum and gas trading, clearing, and settlement, that seeks to evolve into a petroleum and gas trading and pricing center for the Asia-Pacific region. In 2019, the bilateral natural gas transaction volume of SHPGX exceeded 80 billion cubic meters, thereby solidifying its position as the largest natural gas spot trading platform in the Asia-Pacific region.

■ Nisun will leverage its resources, expertise, and advantages in supply chain management and financial services to provide energy enterprises trading on SHPGX's platform with flexible, efficient, and quality financial services. Moreover, based on this cooperation, Nisun International has established a new 'supply chain +' business model, which will be applied in our services to clients in other industries."

■ With Fanhai International School of Finance of Fudan University ("FISF") to build the Nisun Supply Chain Management Training Center.

This partnership aims to promote academic and professional training among students and accelerate research for technological innovation, which includes incorporating blockchain technology into the supply chain field. Addressing the challenges necessary to improve efficiency, the two parties have agreed to collaborate on talent training and coordinate on programs such as research projects, innovative technologies, post-graduate internships, and financial conferences, among others.

■ This cooperation will allow Nisun to further stabilize its supply chain services and help resolve difficulties related to financing among small and medium enterprises through innovative technologies. Simultaneously, this cooperation will create new opportunities for FISF's students in various technological disciplines and valuable experience through real-life challenge and practice. The Nisun Supply Chain Management Training Center will integrate resources and create valuable developments, further contributing to Nisun's greater supply chain ecosystem.
